This table is used for lifetime required distributions. Most IRA owners will use this table, but there is one exception. If the spouse is the sole beneficiary for the entire year AND is more than 10 years younger than the IRA owner, do not use this Uniform Lifetime Table. Instead, use the actual ages of both spouses based on the Joint Life Table. This will result in a longer life expectancy and a smaller required distribution.

This table is used to calculate RMDs for:

- Designated Beneficiaries (DBs) who inherited before 2020.
- DBs who inherit in 2020 or later when the account owner dies ON OR AFTER his RBD - for years 1-9 of the 10-year period.
- Eligible Designated Beneficiaries (EDBs).
- Non-Designated Beneficiaries when the account owner dies ON OR AFTER his RBD for "ghost rule" RMDs.

This table is NOT used by:

- DBs who inherit in 2020 or later when the account owner dies BEFORE the RBD.
- IRA owners to calculate lifetime RMDs.
- Roth IRA beneficiaries, who are not EDBs.
